(54) COATING AGENT AND EASILY ADHESIVE POLYESTER FILM COATED THEREWITH

(57) Abstract:

PURPOSE: To obtain a coating agent having excellent slip properties and blocking resistance to a polyester film and showing excellent adhesiveness to various coating materials, especially to a magnetic coating by compounding a water- insoluble copolyester and acrylic resin.

CONSTITUTION: This coating agent is composed of a water insoluble resin dispersed in water, wherein each of discrete particles is consisting of a blended material of a copolyester with an acrylic resin. This invention further provides a polyester film coated with the coating agent dispersed in water and a manufacturing method of this film by an inline coating method.
